WORK EXPERIENCE

Boise State University Recreation Center, Facility Manager

January 2022 - March 2024

Managed the facilities at the Boise State University Recreation Center, including tasks such as monitoring the occupancy, safety, and condition of the facilities. I supervised other staff on shifts and served as the highest-ranking student staff member in the case of an emergency. Used the Fusion system for management.

PROJECT EXPERIENCE

Luminary Learning Experience, Lead Designer

August 2023 – May 2024

I was working on a team to implement a vision that our client has for the Stein Luminary. Project consists of creating a classroom environment with touch interactive objects to guide users through the learning experience of each client's choosing. Worked briefly with the Luminary Team to integrate Intuiface into our Unity project to create our desired effect. Environment combines a number of C# scripts as well as external assets as reference points.

Immersive VR Experience, Lead Developer

January 2022 – May 2024

I am individually creating and refining an immersive experience in VR using Unity Engine. This involves creating an emotionally-moving experience for the player to walk through for at least 3 minutes and interact with features. I created this experience using an integration of C# scripts into the Unity Engine platform.
